

READ is the latest discovery service with which users can search books in the library and online materials all at once.

## 1. How to search

▼Rikkyo University Library TOP PAGE [http://library.rikkyo.ac.jp/index\\_e.php](http://library.rikkyo.ac.jp/index_e.php)

The screenshot shows the library's top page with the 'READ' tab highlighted. Below it, there are search fields for OPAC and READ, and a 'Search' button. Other options like CiNii Articles, CiNii Books, and eResources A-Z are also visible.

1 Choose the “READ” tab.

2 Just enter the keyword in the search box and click the “Search” button.

Automatically search many fields.

For example, if users enter the title of the journal article, the subject, the author, the publisher, the title of the journal, the title of the book, the volume, the issue, ISBN, ISSN and DOI, they can get the search results related to the above mentioned conditions.

▼Advanced search screen

The advanced search screen allows users to search across multiple fields (Title, Author, etc.) and includes filters for publication date range, content type, language, and more.

Click the “Advanced Search” button and the users can search entering the below conditions.

- Keywords
- Author
- Keywords of the title
- ISBN
- ISSN
- Publication title
- Volume
- Issue
- Publication date range
- Content type
- Language
- Show only (full text, scholarly materials, etc.)
- Exclude from results (Newspaper articles, Book review, etc.)
